VISION

MISSION

The world of digital assets has exploded with the advent of Bitcoin in 2009.

Blockchain technology is fast becoming a standard in the economy, but in a more corporate version.

Undeniably, the web applications and the blockchain are the technologies of the future, of today.

InziderX is a pioneer in the field of web application development and executable program related to blockchain trading technology.

INX DIGITAL ASSET

INX is the digital asset developed for the solutions that InziderX offers to its users.

Based on CryptoNote technology, such as the famous Monero, this protocol has proven its stability and allows complete anonymity of transactions.

The INX GUI allows you to manage your digital assets and perform basic operations. It includes the history of past transactions as well as access to the mining pool.

These programs are available in Windows X64 and Linux X64.

APPLICATION IN DEVELOPMENT

Crypto Signal APP

Signal Providers Application
for trading in crypto

A.I & Algo Robots

A.I & Algo trading development

INX Exchange

Decentralized P2P Exchange

DIGITAL TRADERS APP

Crypto trading signals from qualified providers.
Become a provider and monetize your skills.

Signals

Access a list of signal providers ranked by proven statistics. Receive a real-time alert when a signal is posted.

Market Tools

Graphics, market overview and news. All the tools traders need to build their analysis and monitor the market.

Become a Provider

Predict the market and post your signals. Rank yourself among the best suppliers and monetize your signals.

Statistics and Ranking

The best way to evaluate signal providers is to keep the history of their results and to classify them statistically.

A.I & ALGO TRADING

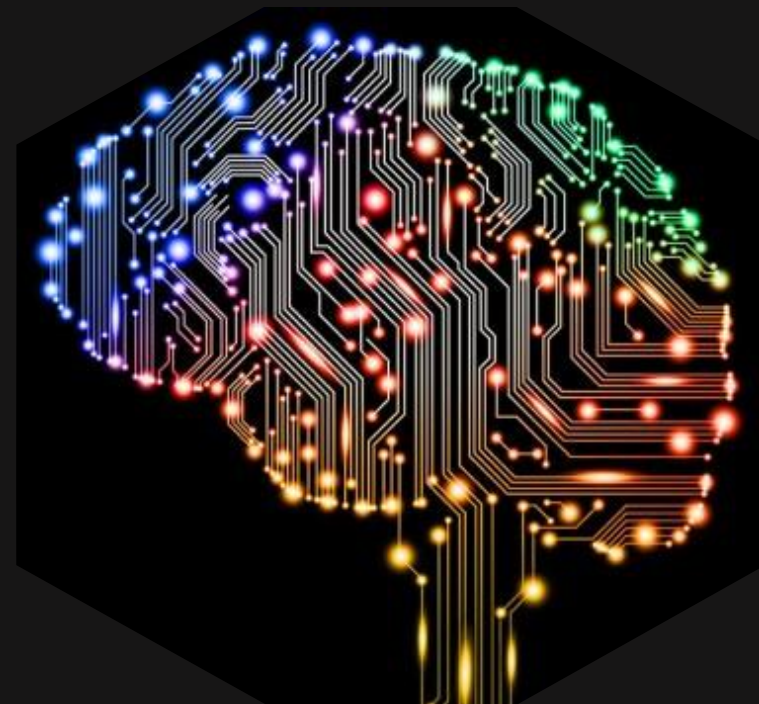

A.I. and the algorithm are the future of trading.

Algorithmic trading already accounts for more than 60% the volume traded daily in the markets.

A.I. trading is the most advanced stage where the extraction of large data was previously inaccessible to humans.

InziderX is dedicated to digital asset trading applications and the best way to achieve this goal is to explore every possible path.

The negotiation with A.I. and algorithm is one of them.

TERMINAL INX

InziderX is the window of the traders
in the markets of tomorrow!

The screenshot displays the InziderX trading terminal interface. The top menu includes File, Account, Reports, News, Services, View, Settings, and Help. The main window is divided into several sections:

- New Order:** A panel for placing orders for BTC/USD. It shows the current price at 9041.10 and the bid price at 9042.20. There are buttons for "Place Bid" and "Place Offer". The amount is set to 0.2 coins.
- Chart:** A candlestick chart for BTC/USD on a 1 Day timeframe. The price is shown as 9041.1. The chart includes a volume indicator at the bottom.
- ORDER BOOK BTC/USD:** A table showing the current order book with columns for COUNT, AMOUNT, TOTAL, PRICE, and INSTRUMENT.
- TRADES BTC/USD:** A table showing recent trades with columns for TIME, PRICE, and AMOUNT.
- TICKERS:** A list of various cryptocurrencies and their current prices and 24-hour percentage changes.
- Position Summary:** A table showing the user's current positions, including columns for Ext. ID, Pos. ID, Instrument, Direction, Amount, Price, Current, Stop Loss, Take Profit, P/L pips, P/L, and Comments.

At the bottom of the terminal, the user's account status is displayed: Equity: 15 363.29, Free Margin: 15 363.29, Used Margin: 0.00, Profit/Loss: N/A, Use of Leverage: 0%, and a "One Click" button. The terminal is connected to the market.
